Carbon Fiber Machine Cover

Carbon Fiber Machine Cover (CFMC) are used primarily for machine covers; replacing stainless steel, aluminum and steel.

CFMC are resin infusion molded with a resin gloss finish on the exterior surface and a matt finish on the interior surface.

CFMC are manufactured from Carbon Fiber Fabric and Epoxy resin, the exterior surface is protected with glass-cloth fabric.

CFMC are edge finished, with corner radius 3/16" unless otherwise specified by customer.

Maximum CFMC width is 48 inches (4ft).

- Color: Opaque Black, Carbon Fiber Fabric Weave Visible
- Max. Temperature 180°F, Low Temperature not rated
- Thickness Tolerance ± 0.010 in
- Width and Length Tolerance ± 0.25 in
- Mounting holes machine with Carbide or Diamond tipped drills.
- Mounting holes, cut outs and large access holes can be machined to customer's prints at additional charge.
- Covers cut to any size
